Project name : Brhma CRM   Discussion Date : 22-07-24

Version : 1.2   Live Date : 01-08-24

Prepared By : *Sathis kumar R (Full Stack Developer)*

Approved By *: Kannan R*

Managed By *: Santhosh*

Summary

A brief overview of the updates made, including the main changes and their purpose

Update Details :

1. Date Range Filter added
2. Option to download dump data as an Excel file
3. Option to download filtered data
4. If rejected in one round, the candidate is considered rejected
5. Added an extra field for the pin code
6. Reset button added to reset the date filter
7. If the mobile number exists in the database, fields will be auto-populated
8. The dashboard now displays only the HR's daily count

Description:

- A calendar has been added to the dashboard page for selecting a specific date directly on the page.
- Clicking on an HR name will display a list of candidates referred by that HR in the candidate database.
- Downloading the details of specific candidates referred by an HR will save an Excel file named in the following format: HR_name-fromdate-todate.xlsx.
- You can download all the data by using the download button on the candidate database page.

- The distance from the company, based on the candidate's pin code, will be calculated and displayed on the report card page and the evaluation page.
- The reset button will only be enabled when a filtered date is selected; otherwise, it will be hidden.
- If a candidate is rejected in any of the rounds, the candidate will be marked as rejected.
- When a candidate enters a mobile number, if it is already in the database, all relevant data will be automatically populated.
